

FACT SHEET
State Route 165: Wolfsen Rehabilitation Project
ROADWAY REHABILITATION/BRIDGE REPLACEMENT

Project Cost: \$25.8 million

Project Location: In Merced County near Los Banos from Henry Miller Road to just south of Route 140. (Post mile 11.7 to post mile 26.7)

Benefits:

- The project will improve traffic operations, reduce traffic congestion, and improve safety along State Route 165.
- The project will reduce truck impacts on traffic operations along State Route 165.
- The project will support continued improvements for planned local, regional, and interregional growth.
- The project will improve access between State Route 99, Interstate 5, and the local street system to support future growth.

Project includes:

- Replacement of the San Joaquin River Bridge with a new structure
- 15 miles of Asphalt overlay
- Modification of SR-165/Santa Fe Grade Rd. intersection
- Modification of SR-165/ Wolfsen Rd. intersection
- Widening Salt Slough Bridge
- Widening San Joaquin River Overflow Bridge

ROAD CLOSURE

- SR-165 will be closed to through traffic from October 3, 2011 to February 12, 2012 to allow removal and replacement of the San Joaquin River Bridge.
- During the closure, the detour route is: Route 152, I-5, Routes 33 and 140.
- SR-165 will be open to local traffic during that time, accessible from the south, but no travel over or under the San Joaquin River Bridge will be permitted.
- Road closure is timed to occur after the majority of the harvest season, but before winter river flows are at their peak
