LOS BANOS SPLASH PAD PROJECT

Parks & Recreation
September 29th, 2020

WHAT IS A SPLASH PAD?

A splash pad, also known as a spray park or water playground, is a popular amenity being added throughout parks across the country.

A splash pad is an area fitted with a non-slip surface with various nozzles and water features that can shower, rain, mist or shoot streams of water. Splash pads operate at zero water depth. Water is collected, filtered, sanitized and re-circulated to keep the water fun flowing in an eco-friendly way!

BENEFITS OF A SPLASH PAD

**Free access
for
community
pride and
family fun!**

**Los Banos
Parks and
Rec's only
water
feature!**

**One of the
most desired
park
amenities
from public
input**

Why are we hosting a Public Meeting?

**Help
prioritize
our future
needs!**

Los Banos Parks and Recreation is conducting a feasibility analysis to select a location for a future splash pad.

Public input will assist with location needs, supporting site improvements and splash pad amenities.

**We want
your
input!**

What is a feasibility analysis?

Evaluate all site needs including:

- Parking availability and availability to entire community
- Locations - Pacheco Park, AG Sports Complex, Ranchwood Park
- Supporting amenities such as shade, landscape, surfacing and fencing
- Restroom access and pump house
- Compliance issues and health codes
